The Movie

Radically combining documentary and scripted elements, *Bisbee '17* follows several members of the close-knit community in Bisbee, Arizona, a former mining town, as they commemorate the 100th anniversary of the Bisbee Deportation, when 1,200 immigrant miners were violently taken from their homes by a deputized force, shipped to the desert on cattle cars and left to die. *Official Selection, 2018 Sundance Film Festival.*

The Nebula Awards are one of the best known and most prestigious science fiction and fantasy awards and are awarded annually in May. They were first given in 1966 and are given in four categories for different lengths of literary works. This year's top award goes to Mary Robinette Kowal for her debut, *The Calculating Stars*. The novel (and its companion, *The Fated Sky*) are set in an alternate history in which an asteroid landed off the coast of North America in 1953, setting off a climate catastrophe. To prevent the extinction of the human race, various nations around the world kick-start an alternate space race to colonize the Solar System before it's too late.

The other nominations include:

The Poppy War by R.F. Kuang

Blackfish City by Sam J. Miller

Spinning Silver by Naomi Novik

Witchmark by C.L. Polk

Trail of Lightning by Rebecca Roanhorse

Check out this year's nominations and winner, as well as past years! Checked out already? Place a hold and we'll send you an email when its available.
